DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims (in part) 1-10, drawn to compounds without Si and first recited process for Formula (I) wherein X, Y, Z are carbon (making phenyl ring), classified in class 514, subclass 64.
 - II. Claims (in part) 1-10, drawn to compounds without Si and first recited process for Formula (I) one of X, Y, Z is Nitrogen, classified in class 546(pyridine ring), subclasses various depending on the nature of variables R1' – R5'.
 - III. Claims (in part) 1-10, drawn to, drawn to compounds without Si and first recited process for Formula (I), wherein XR3' and YR2' are together Oxygen, XR1' = carbon, class 549(furan ring), subclasses various depending on the nature of variables R1' – R5'.
 - IV. Claims (in part) 1-10, drawn to compounds and other processes not included in above groups I-III, classified in class 544(i.e. pyrimidine or 1,4-diazine or pyridazine, subclasses various depending on the nature of variables R1' – R5, and metal like Si.').

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for

Art Unit: 1624

using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case compounds and process of U.S.P. 5776902 can also be used for the utility claimed herein.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: When X,Y,Z are all carbon the core is phenyl; when they make 5-membered furan ring; and when they make either pyrimidine or pyridine cores.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Mr. Scot Hanf on 8/6/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sudhaker B. Patel, D.Sc.Tech. whose telephone number is 703 308 4709. The examiner can normally be reached on 6:30 to 5:00 pm. Monday-Thursday.
